ABDUL AMMAR

SOFTWARE DEVELOPER INTERN

Email: shaikammar011@gmail.com
Phone: +91 7893175137
GitHub: github.com/ammanpro
Location: Hyderabad, India

PROFESSIONAL SUMMARY

Software Developer Intern at **Infer Labs**, working on the **iNexus** enterprise application platform. Familiar with **React, JavaScript, Python, FastAPI, PostgreSQL, and Git**. Use AI-assisted development tools such as **Claude Code** and **Antigravity** to understand existing code, troubleshoot issues, and assist with development tasks. Have knowledge of AWS cloud services, Linux operating systems and commands, and monitoring tools such as Prometheus and Grafana. Familiar with manual software testing and API testing using Swagger. Passionate about exploring AI tools and discovering ways to automate repetitive tasks, streamline workflows, and improve productivity. Interested in improving software development skills and gaining practical experience in backend development, cloud computing, DevOps, and software testing.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, Bash
Frontend: React, Vite, HTML5, CSS3
Backend & APIs: FastAPI, REST APIs
Database & ORM: PostgreSQL, SQLAlchemy
AI Dev Tools: Claude Code, Antigravity
Cloud Computing: AWS (EC2, VPC, S3, Load Balancing)
Operating Systems: Linux, CLI Operations, Shell Scripting
Monitoring Tools: Prometheus, Grafana
Software Testing: Manual Testing, Swagger API, Troubleshooting
Version Control & Others: Git, GitHub, API Integration

WORK EXPERIENCE

Software Developer Intern • Infer Labs — May 8, 2026 – Present

Platform: iNexus Enterprise Suite — iPersonnel & iPayroll Modules • Hyderabad, India

- Work on the enterprise iNexus application, including its iPersonnel and iPayroll modules for workforce and payroll operations.
- Explore and understand existing frontend and backend codebases to accelerate feature development and bug fixes.
- Develop and maintain responsive frontend UI components and functionality with **React and JavaScript**.
- Use **Python and FastAPI** to understand backend APIs, business workflows, and application logic.
- Explore **PostgreSQL** database models, relational schema design, and **SQLAlchemy** ORM relationships.
- Use **Claude Code and Antigravity** to understand complex code, investigate issues, and assist with implementation.
- Manage branches, pull requests, and collaborative code changes effectively using **Git and GitHub**.
- Perform manual testing across application flows to check functionality and identify edge-case issues.
- Conduct API testing using **Swagger** to examine API endpoints, dispatch payloads, and validate responses.
- Develop knowledge of **AWS cloud services** (EC2, VPC, S3) and Linux server administration commands.
- Build familiarity with telemetry and system observability tools, including **Prometheus and Grafana**.

PROJECT EXPERIENCE

iNexus – Enterprise Application Platform — Full-Stack Enterprise

Technologies: *React, JavaScript, Python, FastAPI, PostgreSQL, SQLAlchemy, Git*

- Work directly on the iPersonnel and iPayroll modules facilitating employee workforce tracking and payroll processing.
- Understand how frontend interfaces connect to backend REST APIs and relational database layers.
- Explore payroll computation workflows and their structural dependencies on employee-management data.
- Investigate code and integration issues using modern development tools and AI-assisted coding workflows.
- Support application testing and investigate API and frontend-backend integration issues.

EDUCATION

Bachelor of Technology (B.Tech) – Civil Engineering
Srinivasa Ramanujan Institute of Technology (SRIT)
Graduated: 2023

PROFESSIONAL INTERESTS

- **AI & Workflow Automation:** Automating repetitive manual tasks.
- **AI-Assisted Development:** Claude Code & Antigravity acceleration.
- **Continuous Learning:** Backend engineering, cloud, and DevOps.
